Who we are

One system for the owner and the accountant

Jadara Finance keeps the daily accounting work in one place. A sale or a purchase posts a balanced entry, and the same data prints in Arabic or English. It runs in the browser on a phone or a computer, and each company's data stays separate.

Vision

A Saudi business runs its invoices, accounts, and financial statements from Jadara Finance, in one place built for VAT, zakat, and e-invoicing in the Kingdom.

Mission

We simplify the daily financial work. Sales, purchases, and inventory post their own entries. Reports are in Arabic and English. Each company's data stays separate from the others.

Goals

Help the business issue invoices with a QR code, follow VAT and zakat, and produce a trial balance and financial statements, without a second program.

- A tax invoice with a QR code. VAT is calculated and posted without a manual entry.
- The general ledger, trial balance, and four financial statements come from the same journals.
- Inventory, point of sale, and more than one branch when the business grows.
- Activation within 24 hours of receiving the bank transfer.

Separate data
One company's accounts never mix with another's. Roles are set inside the company.

Arabic and English
The screen, chart of accounts, reports, and documents use both languages.

Automatic entries
Invoices, vouchers, returns, and stock counts post without a manual journal.

Daily backup
The hosting provider takes a daily backup of the whole server, including accounts, entries, invoices, and inventory.

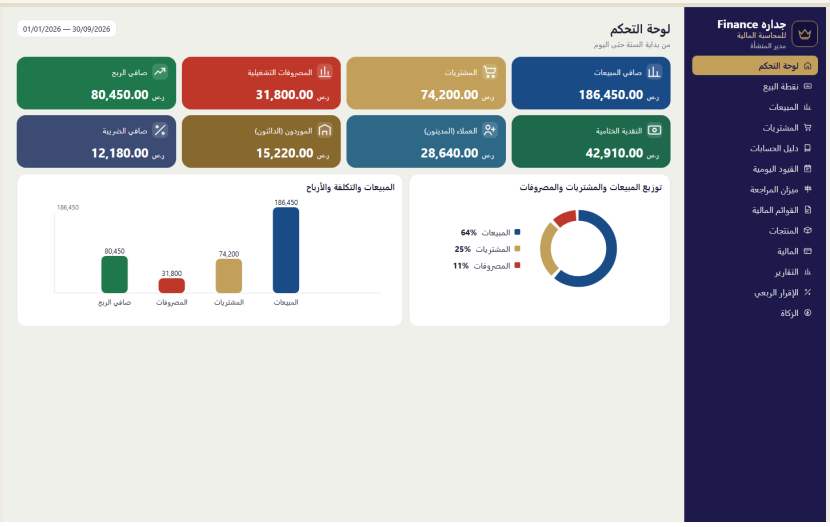

Room to grow
Start on Basic and move to Advanced at any time. Only the remaining term is charged.

In the browser
Nothing to install. It runs on a computer and a phone.

Inside the system

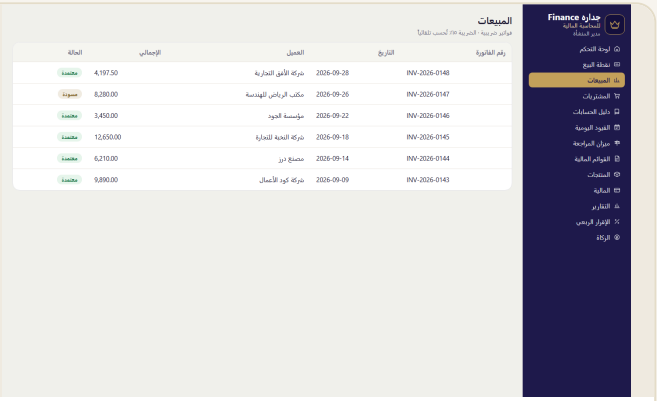

The screens people use every day

Sample figures. The layout is the live product.

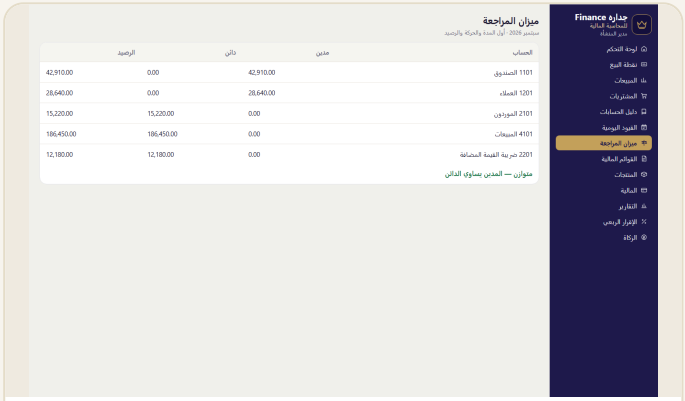

Dashboard

Colored tiles for sales, purchases, profit, cash, and customers sit above the charts: a mix, then sales, cost, and profit columns.

Sales list

Sales invoices with status and amount. VAT is calculated when the invoice is posted.

Trial balance

Opening, movement, and closing balance. An entry posts only when debits equal credits.

Sections

Every section posts to the ledger

A sale, a purchase, or a payment updates the journals, inventory, and reports. The list below is the menu the company admin sees.

Daily work

Dashboard	Colored tiles for sales, purchases, profit, cash, and customers, with a mix chart and columns.
Sales	Quotations, sales orders, tax invoices, and returns.
Purchases	Purchase invoices. Requests, orders, and returns are on the Advanced plan.
Point of sale	A till that reduces stock, posts the entry, and records the collection. Advanced plan.
Treasury	Cash boxes, bank accounts, receipts, and payments.

Accounting

Chart of accounts	A bilingual Saudi chart that can grow.
Journal entries	Balanced compound entries, with as many lines as needed.
Trial balance	Opening, movement, and closing balance.
Financial statements	Income, financial position, cash flows, and changes in equity.
Fiscal periods	Years, opening balances, and a closing entry. A closed period accepts no new posting.
Data integrity	Confirms the journals balance before the reports are relied on.

Basic covers accounting, invoices, and treasury. Advanced adds inventory, point of sale, branches, the VAT return, and zakat.

Sections

Every section posts to the ledger

Inventory and branches

Products	Items, categories, and units of measure. Advanced plan.
Branches and warehouses	More than one branch and warehouse, with transfers. Advanced plan.
Stock count	A physical count that posts the difference. Advanced plan.

VAT, zakat, and e-invoicing

Quarterly VAT return	Output and input VAT in a printable return. Advanced plan.
Zakat	Zakat base using the sources-of-funds method. Advanced plan.
E-invoicing	Tax and simplified invoices, credit and debit notes, and a QR code in TLV encoding. The technical integration was tested in the developer environment. Production linking is done for each company with its own data and authorization on the Fatoora platform. A subscription alone is not an accreditation.

Administration and support

Users and roles	One user on Basic, up to five on Advanced, with roles set by the company admin.
Discount codes	A discount on the sales invoice before VAT.
Support ticket	Opened inside the system. Jadara looks at the issue, works on it, and reports the result.
Reports	Sales, purchases, customers, suppliers, inventory, and accounting. Printed in Arabic or English.
Print layout	The company logo, name, and unified number sit at the top left. Jadara sits at the top right.

Clients
